Lightroom is now the winner of the Addictive Free Apps competition. As my colleague, Kelly Joon Lee, wrote a month ago , the "all our best apps are on sale" promotion of nine popular apps, including Photoshop, is a particularly good time to get the upgrades. To demonstrate that concept, Adobe is running a special sale on some of its apps for a limited time only. Two of the apps in the promotion—Camera RAW for iPad and Photoshop for the iPad—are getting some significant upgrades to their apps. One of the new features for Photoshop for iPad, called "Adjustment overlay brushes," adds the ability to create unique brush effects to mimic what you can do in Photoshop on your desktop. The new technique, which can be found with the **Macintosh Files Folder** option in the Photoshop app, lets you set up brush effects that work on all your files. When you create a brush effect in Photoshop and then save it as a file, you can bring that effect into Lightroom.

The Clone Stamp is best used to correct a small portion of a photo that goes wrong, by replicating your layer and then replacing the bad pixels with the new copy. It's also useful for cloning a smaller section of your layer. The Content Aware Fill option also fills in blank areas in an image, although it requires you to mark the areas you'd like it to fill in. - **Where to Find It:** You'll find the Clone Stamp tool at the top of the Layers palette, and the Content Aware Fill option under the Layers palette, in the Adjustment Layers group. **How to Use It:** The Move tool works like a ruler - you may have seen it on the ruler in the drawing tool. You can reposition an object or affect an object's size by dragging it to a new point. You can also move objects that are on dynamic layers - such as groups or layers on the Timeline panel that are helping frame the photo. **Why Use It:** The Move tool is the quickest way to move or reposition an object. In particular, if you've selected the moving target, just drag the marquee feature to resize the object. The Resize tool can be used to resize an object's size. e3d0a04c9c
